

## PART C – Django Model Layer (30 marks)

You are provided with an ERD for car dealership.

Please perform following tasks:

C1. In your Django project please create **models.py**

C2. Create models based on the ERD above.

Pleas try your best to create as many models as possible. Each model correctly created will give you marks.

## PART D – Github Commit / Push (10 marks)

Your Github submission must contain 3 files:

- PartA.py
- PartB.py
- models.py

Github commit / push with timestamps after the test time will **NOT** be accepted.

Github repository should be **public**.

The submission on Brightspace is a text file containing the URL to your Github repository.
